EXPERIENCE

- RootNik Labs, Penetration Testing Intern** 08/2026 – Present
- Conducted reconnaissance and vulnerability assessment using security testing methodologies.
 - Performed network and web application security testing in controlled environments.
 - Identified and analysed potential security vulnerabilities.
- MY Bharat, Experiential Learning Program (ELP) - Cyber Security** 06/2025 – 07/2025
- Completed an experiential learning program emphasizing collaboration, practical problem-solving, cyber threats, phishing, malware, password security, online privacy, and information security fundamentals.

EDUCATION

- B.Sc. Cyber Security, Supreme Institute of Management & Technology** 08/2024 – 2027
- XII (WBCHSE), Itachuna Sree Narayan Institution (H.S)** 05/2023 – 05/2024

SKILL

Cybersecurity

Vulnerability Assessment, Network Security, Penetration Testing, Incident Response, Log Analysis, Malware Detection, Ethical Hacking

Networking

TCP/IP, IPv4/IPv6, DNS, DHCP, HTTP/HTTPS, VPN, VLAN, Routing & Switching

Programming & DevOps

Python, C, SQL, Git, GitHub, Shell Script

Security Tools

Nmap, Wireshark, Burp Suite, OWASP ZAP, Gobuster, Hydra, enum4linux, smbclient

Operating Systems

Windows, Linux

Cryptography

SHA-256, MD5, SHA-1, AES, RSA, Digital Signatures, Hash Integrity Verification

TRAINING & CERTIFICATIONS

- Pre Security** [🔗](#), Pre Security Learning Path | TryHackMe
- CCNA (Cisco Certified Network Associate) – Training**, Aptech Learning | In Progress
- Introduction to Cybersecurity** | Cisco Networking Academy
- Networking Basics** | Cisco Networking Academy [🔗](#)
- Python Course** | GeeksforGeeks [🔗](#)
- Java (Basic)** | HackerRank [🔗](#)
- Python (Basic)** | HackerRank [🔗](#)

ACADEMIC PROJECTS

File Integrity Monitoring (FIM) [🔗](#)

- Technologies: Python, SHA-256, File Integrity Monitoring
- Created a baseline of monitored files using cryptographic hashes.
- Detected new, modified, and deleted files through baseline comparison.

Basic Antivirus Simulation [🔗](#)

- Technologies: Python, SHA-256, Signature-based Detection
- Developed a signature-based malware detection simulation.
- Generated SHA-256 hashes and compared them against known signatures.

ACHIEVEMENTS / HOBBIES

- ICTCSDP 2026 – International Conference on Emerging Trends in Cyber Security & Digital Protection** 06/2026 – 06/2026
- Cyber Apocalypse CTF 2026 | Hack The Box** 07/2026 – 07/2026
- HackSpire'25 Hackathon | Project Development & Innovation** 11/2025 – 11/2025
